SEED EXPORTS TOTAL \$246.5 MILLION

Exports of U.S. seeds for planting totaled \$246.5 million for July 1981-April 1982, 6 percent below last year. April exports of \$23.0 million were 10 percent below a year earlier. Forage seed exports continued to lag while flower, corn, soybean and sugar beet seeds moved well at levels above last year.

Forage seed exports totaled \$55.1 million, down 23 percent through April. However, exports of \$5.3 million for the month of April were 8 percent above the same period last year. Clover seed exports were valued at \$5.0 million, a 7 percent increase over a year ago, the lone bright spot in the forage seed export picture.

Vegetable seed exports of \$87.8 million were 5 percent below the July-April period last year. Exports of \$10.0 million during April, however, were 7 percent above a year earlier. Sweet corn seed and pea seed exports each totaled \$11 million as of April 30, up 36 percent and 2 percent, respectively, and totaled one-quarter of vegetable seed export value. Radish and tomato seed exports also moved well while exports of most other seeds declined in value from a year earlier.

Corn seed exports continued at a brisk pace, totaling \$52.6 million, up 29 percent above last year. Flower, soybean and sugar beet seed shipments also have done well, totaling \$4.4 million, \$9.9 million and \$2.1 million, up 22 percent, 68 percent and 23 percent, respectively. Sorghum seed sales have lagged somewhat, totaling \$21.3 million, down 7 percent this year.

Shipments to the European Community totaled \$68.7 million, 4 percent below a year earlier, and made up 28 percent of total U.S. seed exports for this July-April period. Corn seed, valued at \$23.3 million, an increase of 94 percent, was exported to the EC. Italy received 71 percent of these corn seed shipments. France, also a major corn seed destination, has received \$5.0 million as of April 30. Flower, sorghum and soybean seeds have all moved well to the EC while shipments of forage and vegetable seeds have lagged substantially.

Mexico continues as the number one market for U.S. seeds this year. Shipments through April totaled \$41.7 million, an increase of 23 percent over last year and 17 percent of total U.S. seed exports. Forage seed exports to Mexico continue to lag, totaling \$7.2 million, 29 percent below a year earlier. However, substantial increases have been reported for most other seeds. April U.S. exports, valued at \$5.4 million, increased year-to-date total seed exports to Canada to \$28.2 million and moved Canada up to the number two market position. Forage seed exports to Canada totaled \$9.6 million, lagging 22 percent below last year. Exports to Japan, the number three market, continue to lag at \$26.9 million, 6 percent under a year ago. Exports to Italy and France, the number four and five markets, continue very strong at \$24.9 million and \$13.8 million, up 9 percent and 30 percent, respectively, through April.

The African markets of Egypt, Libya and the Republic of South Africa have shown significant gains to date. This has also been true for Greece, Saudi Arabia and Australia.

TRADE ALERT
